

Surviving Hetzers and G-13 Tanks

Last update : 15 June 2026

Listed here are the Hetzers and G-13 Jagdpanzers that still exist today.

Jagdpanzer 38(t) Hetzer – Arsenalen Tank Museum, Strängnäs (Sweden) – running c.

Fahrgestell number 321364 (BMM, built in summer 1944). It is one of four Hetzers, bought by Sweden after the war for trials.

A periscope from an Strv m/41 tank is installed on this Hetzer (Alex Pankov)

Jagdpanzer 38(t) Hetzer – Bruce Crompton Collection (UK) – running condition

It was knocked out on April 13th 1945 by the 7th Btn, Hampshire Rgt. during the battle for the town of Cloppenburg (near Bremen), with a direct hit from an anti-tank gun on the left side, near the front (probably killing the driver). The shrapnel damage can still be seen on the inside. After the war it was bulldozed in a bombcrater until it was discovered and recovered during roadworks in 1982. Mr. Crompton bought it from the previous German owner about 10-12 years ago, it was poorly restored then and not in running condition. This vehicle was **not** recovered from the Vilseck barracks, as stated before (Bruce Crompton via "earlymb")

Fahrgestell number 323010, built by Skoda (Rene Martinez)

Walter Schwabe, May 2025

Jagdpanzer 38(t) Hetzer – Private collection (Germany)

Fahrgestellnummer 323326, built as a Jagdpanzer 38(t) in January 1945. Later converted to G-13 and restored back to Jagdpanzer 38(t) specs, it now has an original main gun - <https://www.jagdpanzer38.de/>

Walter Schwabe, May 2026

Jagdpanzer 38(t) Hetzer – Private collection (Germany)

This is a Jgd.Pz. 38 Command "Hetzer" build in late 1944 by Skoda, chassis number 323 192. This vehicle has the original petrol Praga engine and is in running condition, it also had the complete working radio system Fu5 and Fu 8 which was only installed in Command vehicles. It was found after war in South Germany (info from the owner)

Jagdpanzer 38(t) Hetzer – Polish Army Museum, Warsaw (Poland)

Recovered in 1989 from the Utrata River. The vehicle probably belonged to the 73rd Infantry Division of the Wehrmacht and was blown up by its own crew on January 17, 1945, during the retreat of German troops in the Błonie area (Panzer-Archeology)

Jagdpanzer 38(t) Hetzer – Wilczy Szaniec, Lasy Państwowe, Gierłoż (Poland)

This Hetzer was recovered from the Hel Peninsula in May, 2007. It has been repainted as "Chwat", a Hetzer captured by Poles during the Warsaw uprising in August, 1944. Photos of the recovery here : <http://www.odkrywca.pl/galerie.php?nazwa=432>

Jagdpanzer 38(t) Hetzer Army Technical Museum, Lešany (Czech Republic)

This SPG (without the main gun) has been captured with three other ones by Czechoslovak rebels on 5 May 1945 at a Skoda factory in Smíchov (Fahrgestell numbers 323627, 323628 and 323629). They have taken part to battles in the streets of Prague. The main guns have been replaced by machineguns (Alex Pankov)

Jagdpanzer 38(t) Hetzer – Australian Armour and Artillery Museum, Cairns, QLD (Australia) – running condition

This particular tank had been stored for 10 years in a private collection in Germany after being used as a G13 by the Swiss Army. The Fahrgestell Number (323437) denotes it was built by Skoda in January 1945, and knocked out near Prague in May 1945. It was then returned back to the factory's to be rebuilt. It was never returned to service, and at the end of the war became part of the consignment sold to the Swiss Army as a G13. Our brief from was to make it into a totally wartime spec Hetzer Jagdpanzer 38t removing all trace of its Swiss army history (Axis Track Services)

Jagdpanzer 38(t) Hetzer – Fort Lee U.S. Army Ordnance Museum, VA (USA)

Previously part of Aberdeen proving ground museum. Fahrgestell number 323814 (Rene Martinez), it has been captured at a Skoda Factory in Plzen, Czech Republic (USA AFVs register). The tank has been restored and repainted recently in a "particular" (experimental?) camouflage scheme. This paint is said to fit to the original factory layer of paint done in 1945 at the Skoda factory. Original remains of these scheme and colours have been found during the restoration when the paint was stripped away. (<http://www.twenot.nl/> forum, AFV News forum)

Jagdpanzer 38(t) Hetzer – Canadian Forces Base, Borden (Canada)

Early variant, Fahrgestell number 321042, built by BMM (Alex Pankov)

Pierre-Olivier Buan, June 2014

Jagdpanzer 38(t) Hetzer wreck – Rex & Rod Cadman Collection (UK)

Fahrgestell Number 321810, built in November 1944 (Tom Jentz and Hilary Doyle via Rod Cadman). This is in fact an original Jagdpanzer38t which came from France. If you look carefully at the photograph you can clearly see the chassis number plate on the front glacis plate. The vehicle still has its original petrol engine fitted, and the original square type oil filter. Some other details can tell for sure that it is an original Jagdpanzer 38 (t) (Rod Cadman) This vehicle is possibly a Fahrschulepanzer, dedicated to the drivers' education (Stefan De Meyer)

Fahrgestell number 323816, built by Skoda. There are two theories about this tank :

- in 1944, it was rebuilt by EWS to Berge-Hetzer nr.104 (this seems to be confirmed by markings on the front hull)
- the tank number 323816 is reported in the list of the panzers recovered and used by the Czech army after the war to have been a flamethrower tank

I'm looking for photos of those tanks :

G-13 Tank Destroyer – Unknow owner, Bischof (Germany)
G-13 Tank Destroyer (M-78058) – Bitburg (Germany) – running condition
G-13 Tank Destroyer (M-78193) – Army base, Othmarsingen (Switzerland) – running condition
G-13 Tank Destroyer (M-78199) – Unknow location – running condition

any Hetzer or G-13 that I forgot...

This document is a synthesis of photos and information published on the web.
I would like to thank the people who took these photos and put them on their websites, or sent them to me, and also those who helped me doing these lists (particularly people of the AFV News Discussion Board). For any question, you can email me at
